Description

ALEDECO Global's G8 LED Bulb is energy-efficient, long-lasting and bright, it works well as a replacement existing decorative incandescent bulbs. It closely resembles the look of a filament with excellent color temperature, light output and is a great choice to replace any incandescent style 6S6 bulb.

The G8 LED Bulb works well for use in signs, marquee signs, string lighting, amusement park lighting and chasing systems among other applications. It provides crisp bright colors and is available in warm white, white, red, blue, green and amber.
